MNLU Mumbai KRC (Library) ICT-Enabled Library Services

❖ **Installed RFID System:**

- The RFID system, installed in 2020, is designed to streamline and enhance library operations by providing faster, more accurate, and secure services. It significantly improves efficiency, accuracy, and security. By automating routine tasks like checkouts, returns, and renewals, and incorporating theft detection at the gates, the library provides faster and more reliable service to users, while reducing manual labor and minimizing errors. The combination of RFID tags, smart card readers, staff stations, and gate antennas creates a seamless and secure library experience.
- RFID Tags: RFID tags, attached to books, store detailed information about each book, including its unique identification number, allowing the system to track the book efficiently.

- Smart Card Reader: The smart card reader facilitates transactions involving library users. Students or patrons use RFID-based smart cards for transactions like borrowing, returning, or renewing books.
- Staff Station Reader: The staff station reader is used by library staff to perform RFID tagging and circulation operations, ensuring accurate inventory and transaction records.
- Gate Antenna System: The gate antenna system monitors the movement of tagged materials, preventing theft or unauthorized removal of books.
- Handheld Reader: The handheld reader is used for on-the-go scanning of RFID tags, making inventory checks, stock-taking, and book searches more efficient.
- ❖ Turnitin: Turnitin is proprietary software used to check documents for similarities or potential instances of plagiarism.
- ❖ Digital Attendance Systems: Digital attendance systems have also been installed.
